### **Meeting Notes:**

- in terms of navigation, bolden whats selected when you hover it
- keep the site simple, just appreciate the art
- personally liking the vertical navigation more, but keeping the rounded corners would be nice
- mobile version make the nav bar something you expand
- hover over the photos and then when you click on it it takes you to the film
- I want people to see the film and want to explore more!
- met in person again
